Liberty Technologies LLC is an SBA Certified 8(a) Program Participant and a GSA MAS-Schedule 70 holder (#47QTCA21D0010). Liberty provides Acquisition Support and other professional services to federal agencies, state/local government and commercial clients. Other services include program management support, administrative support, financial system support, financial consulting, software development/sustainment, cyber security/training, event coordination, cyber security/training, records management, help desk/call centers, video teleconferencing, audio-visual, mission/staff augmentation and other services.

Liberty Technologies is teamed with and supported by Ardent Technologies, Inc., a 21-year-old small business that provides a full range of professional services that serves the federal, commercial, state/local government and education markets with over **forty (40+) 8(a) sole-source contracts** with twenty (20+) federal agencies and forty (40+) state/local agencies in thirty (30+) U.S. states.

Liberty Technologies specializes in both new and expiring 8(a) sole-source contracts where the incumbent has graduated, with competitive salaries, company sponsored medical, dental and vision insurance, 401K (w/company match), quick and smooth onboarding, experienced program management implementation support, strong contract management and agile mission support/staff augmentation to fill any open seats or handle new requirements.

SBA 8(a) Advantages

8(a) companies can be awarded sole-source federal contracts up to $4.5M with no competition and without the risk of a protest.

The SBA 8(a) sole-source contracting method avoids a long, expensive and complex procurement cycle and is significantly faster than other means of contracting. Simply contact the 8(a) company's local SBA District Office to ask that the procurement be sole sourced under the 8(a) program.

A sampling of contracts performed is below:

US COAST GUARD – ACQUISITION AND DATA INTEGRATION SUPPORT SERVICES (USCG: GS00Q17GW2066; TO:70Z02319FACS00900)

Ardent provides support to integrate acquisition data from the USCG's Contract Information Management System (CIMS), Core Accounting System (CAS), Financial Procurement Desktop (FPD), Aviation Logistics Management Information System (ALMIS), Naval Electronics Supply Support System (NESSS), USCG's Acquisition Performance Management System (APMS), and SAS Business Intelligence (BI) system into the USCG Acquisition Directorate's (CG-9's) established acquisition data mart to support the USCG in developing acquisition performance metrics, measures and management reports. We extract acquisition data from a variety of databases, migrate it into CG-9's data mart, and works with the CG-9 Data Integration Team to provide the data sets and Online Analytical Processing (OLAP) cubes that subset and organize data for the Coast Guard acquisition community. Ardent also works with CG-9 Data Integration Team to establish and configure/format information maps; provide customized web-based reports and BI dashboard portlets for use by acquisition users; verify and validate existing documentation; and create canned and ad-hoc acquisition performance and management reports that are available for end users.

BUSINESS OPERATIONS SUPPORT (ARMY INFORMATION SYSTEMS ENGINEERING COMMAND

(ISEC: W9128Z-19-C-0001)

Ardent performs business operations tasks that support ISEC Satellite Communications (SATCOM) real property database management, which in turn supports ISEC acquisition-related data requests. To facilitate Government operations and accurate business accounting practices for customers, ISEC utilizes an Access database in which all accountable property is tracked. This database allows ISEC to track large quantities of SATCOM equipment that is stored in preparation of system fielding. This enables the Government to readily maintain full accountability for property used by the group, whether the property is procured by ISEC or provided by the customer. Additionally, Ardent developed an Access database to track all Government property items (excluding ISEC hand receipt items) associated with the fielding of satellite systems. The database contains metadata search and report generation capabilities which also support ISEC needs for acquisition data and purchase decision-making.

ACQUISITION AND ENTERPRISE SERVICES SUPPORT SERVICES

(USAF: FA8771-17-C-0014)

Ardent provides a team of program management and business analysts to support the Air Force Program Executive Office/Business and Enterprise Systems (AFPEO/BES) at Maxwell Air Force Base – Gunter Annex, Alabama. Our team supports two major Air Force programs: NETCENTS-2/SBEAS, and ITBAO:

Contract Scope Support – Ensuring the Tracker Repository of technical, protocol, and policy documentation is kept up to date; providing IT acquisition support; documenting metrics/performance thresholds and guidance for different requirements types; participating in applicable security standards bodies.

Metrics Support – Identifying costs savings related to PWS savings targets; supporting program management review meetings; tracking, analyzing, and reporting on contract vendor usage; performing analysis of products spending information to identify mismatches between contractor-provided and government data; delivering briefings, reports, correspondence, and/or files in direct support of programs.

Database Support – Performing analysis of contractor deliverables and matching data; data cleansing operations and reports; researching and maintaining pricing data on IT hardware and software; compiling and reporting on information related to program suspenses.

Reporting – Providing IT research, analysis, and reporting expertise in Air Force IT hardware, software, and services to support stakeholders, including delivering reports to support decision making by high-level Air Force officials.

(CONTINUED)

Ardent has successfully maintained support for AFPEO/BES, meeting or exceeding 100% of the Government's delivery timetables. The Government has benefitted from Ardent's leadership, expertise and commitment to responding to organizational changes and shifting requirements, commending our senior management for providing "the right guidance and direction to ensure success for Ardent" and our team's "right mix of AF experience ensuring that the interaction between Ardent and end user community is successful and well-received by both the end-user community and [...] PMO leadership."

Additionally, Ardent provides extensive business case development and process analysis in support of ITBAO, as we perform extensive performance analyses related to identified IT-related issues in contracting, financial, and asset inventory processes. Our teams use baseline requirements and business requirements to construct development roadmaps for the USAF. In each task, our team evaluates requirements against current capabilities to define a clear set of use cases for future development. Additionally, our team provides business process improvement recommendations to the USAF to improve and enhance IT acquisitions.

Ardent provides extensive support for IT Business Processes through performance analyses, reporting, and recommendations on streamlining processes in support of cost savings. These analyses often involve input from subject matter experts as well as internal and external stakeholders, whose input aids our team to recommend and implement solutions to automate or streamline IT processes such as reporting. For example, as part of our analysis of quarterly MAJCOM A6 IT spends reports, our team identified potential cost savings and researched and recommended new data visualization schemas to support senior-level Air Force decision making.

8(a) Sole-Source Advantages

Team LIBERTY

Sole-Source Award

Requirements Growth

Direct Tasking

Benefits of 8(a) Sole-Source Process

- Expedited Timeline
- No protests
- Flexible
- Subcontracting team development
- Direct negotiations

01 Client and Contracting Officer (CO) decide to sole source the project

02 CO sends Letter of Intent to Award Project Description to SBA Officer

03 SBA officer reviews the Project Description to confirm Liberty's capability

04 SBA Officer conveys acceptance to CO

05 CO initiates negotiations with Liberty

06 Contract Terms are finalized and Contract awarded

What our Clients say...

Our Customers Say it Best:

"I want to say thanks for all the hard work – our Deputy just gave you a shout out, and it's well deserved."

"Thank you very much for all you & your team are doing – your guys are the best!"

"Our Director said that the top comment he hears from the employees is how well your team is doing supporting the remote workforce and how fast we were able to ramp up our telework servers. He could not have been happier and congratulated the team."
